Play OUR AMAZING COURSE YEAR ROUND
Once you play Sierra del Rio, you’ll come back again and again!

SIERRA DEL RIO
A gently-winding road leads you from New Mexico’s high-desert landscape into a seemingly endless expanse of manicured grasses, natural vegetation and clearwater ponds, with elegant homes dotting the lush landscape. Welcome to Sierra del Rio at Turtleback Mountain Resort.

If you have yet to play Sierra del Rio, you’re long overdue! Just an hour north of Las Cruces and only two hours south of Albuquerque, our 18-hole championship course offers a golf experience that will bring you back again and again. Recognized by Golf Digest as one of New Mexico’s Ten Best Golf Courses, Sierra del Rio is also noted as one of the most challenging courses in New Mexico.

Home to PGA Hall of Fame inductee and PGA Professional Emeritus Guy Wimberly, Sierra del Rio’s elevated tees, tiered greens, winding fairways and magnificent blue waters challenge the best of golfers, yet can be enjoyed by golfers of all skill levels. The course is also a popular tournament destination.

Thanks to roughly 340 days of annual sunshine and our mild climate, you’ll enjoy playing year-round. And when it comes to the 19th hole, our bar, restaurant and expansive patio, with dramatic views of the course and Turtleback Mountain, offer the perfect end to every round.

Golf all day or combine your golf play with boating, jet skiing, fishing, off-roading, mountain biking and plenty of other activities.

Experience THE WONDERS OF SPACE

This first-of-its-kind international space facility will give you an up-close and personal look at the future of space travel.

SPACEPORT AMERICA

The world’s first purpose-built commercial spaceport, Spaceport America, is home to some of the world’s most prestigious aerospace companies, including Virgin Galactic, Boeing, UP Aerospace, EXOS Aerospace, HyperSciences and SpinLaunch.

Located just over 30 miles from Elephant Butte, the facility is designed for both runway and vertical launches. The site was chosen for several reasons, including roughly 340 days of annual sunshine, low humidity, high altitude, low population density and its adjacency to the White Sands Missile Range restricted air space.

While much of the launch activity will involve research and carrying payloads into suborbital space, Virgin Galactic will be taking guests (those who can afford it!) into suborbital space on White Knight Two, with each earning their astronaut wings in the process.

Spaceport America is expected to welcome over 200,000 visitors per year. Visitors are required to take guided tours, which begin just a few miles from Elephant Butte at the Spaceport America Visitor Center in Truth or Consequences, with plenty of interesting information and beautiful scenery along the way as they travel to and from Spaceport.
